THIRUMALAI NAMBI S

thirumalainambi.official@gmail.com | +91 9962208939 | Portfolio | GitHub | LinkedIn

EXECUTIVE SUMMARY

AI and Data Science undergraduate with hands-on internship experience in Data Science and Machine Learning, applying Python, PySpark, and Scikit-learn to real-world predictive modeling and analytics problems. Skilled in building end-to-end ML pipelines, from data preprocessing and feature engineering to model evaluation, with additional exposure to NLP, computer vision, and IoT-driven projects. Proven ability to translate data into actionable insights within collaborative, remote, and project-based environments.

EDUCATION

St Peter's College of Engineering and Technology, Avadi, Chennai 2023 - 2027
B.Tech in Artificial Intelligence and Data Science (Honours), CGPA: 8.3

PROFESSIONAL EXPERIENCE

Data Science & Machine Learning Intern - Zaalima Development Pvt. Ltd. March 2026

- Worked on machine learning models and data-driven solutions in a remote collaborative environment
- Assisted in building, evaluating, and optimizing ML models for real-world applications
- Developed practical experience in data handling, model performance evaluation, and project-based learning

Data Science Intern - Edufyi Tech Solutions December 2025

- Completed a structured Data Science internship focusing on real-world datasets and analytical techniques
- Applied data preprocessing, visualization, and basic machine learning models to derive insights
- Gained hands-on experience in Python, data analysis libraries, and problem-solving methodologies

PROJECTS

Customer Churn Prediction

- Developed an ML model to predict customer churn using Python and Scikit-learn; performed EDA, feature engineering, and implemented Logistic Regression and Random Forest, evaluated via accuracy, precision, recall, and confusion matrix

SparkScale Churn (Big Data)

- Built a scalable churn prediction system using PySpark and Apache Spark MLlib with a distributed ETL pipeline for large telecom datasets, optimized via parallel and cluster-based execution

AI Notes Summarizer

- Built an NLP-based summarization tool (Python, Streamlit) supporting PDF, text, audio, and YouTube inputs with tokenization, auto-phrasing, and real-time summarization

ADDITIONAL PROJECTS

- Weather Web App (JS, HTML, CSS) | Mock Interview Platform | Chatbot (NLP) | Portfolio Website

SKILLS

Programming Languages: Python, JavaScript, SQL, Java (Basic)

Web Technologies: HTML, TailwindCSS, TypeScript

AI Agent Tools: Flow Wise, n8n, Claude , Antigravity

Frameworks: Git, React, Scikit-learn, Pandas, NumPy, Streamlit, Next.js, Tensorflow

Tools: Git, GitHub, Jupyter Notebook, Google Colab, Microsoft Office, Power BI

Technologies: Machine Learning, NLP, Computer Vision, PySpark , Hadoop

Languages: English, Tamil (Native)
